

9/12/2015

Dear Friends,

Hooray! The Touchmark Guitars Patent was granted on April 7, 2015 US 9,000,287 B1
"Electric Guitar Interface and Method" ...and now we have even more Traction!

This is an open invitation to Invest in Touchmark Guitars!

We are fundraising for a startup investment of \$500K. The initial goal is \$150K Seed funding for the company formation, marketing and production design. Then first round funding of \$350K for full production and marketing as described in our startup plan.

I am seeking Individuals, Angels and Equity Investors to become early adopters, as well as Reward Funding to attract professional guitar players for their endorsements.

The first priority is to assemble a great founding team of talent, energy and resources!

Please visit our website www.touchmarkguitars.com to watch our TM Pitch Deck Video which demonstrates the Idea and describes the business model. Contact me if you are interested in contributing in any way. I look forward to your call.

Sincerely,

Mark Andersen
